CHECK-UP AND CLEAN

DENTAL CHECK-UP

A dental check-up and clean is an important part of preventative dental care.

A dental check-up allows your dentist to review the health of your teeth, gums, tongue, mouth, lips, and saliva. Regular check-ups allow the dentist to detect problems that you may not see or feel and identify early signs of gum disease and tooth decay. Decay often does not cause pain or become visible until it has become more advanced.

With good oral health being linked to good general health, check-ups and cleans are an important dental treatment.

We would love to
get to know you
and look after your
smile!

CHECK-UP AND CLEAN

Includes

Exam | X-Ray | Clean | Fluoride

Have a health fund?

NO GAP* for all private health fund members with available dental extras which cover the entire cost of a check-up and clean.

*Not all health funds will cover the entire cost of a check-up and clean. In this case, anyone 18 years and over would be required to pay the out-of-pocket cost up to the amount of \$150.

*NO GAP for children 17 years and under.

No health fund?

No more than \$150 for adults.

Kids who are medicare eligible will be bulk-billed through the Child Dental Benefits Schedule (CDBS).
